

Low Quiescent Current, High Voltage Step-Down Converter

DESCRIPTION

Demonstration circuit 2221A is a low quiescent current, synchronous buck converter featuring the [LTC®3807EFE](#). This demo board converts a 16V to 38V input voltage to a 12V at 15A output.

The main features of this board include an internal LDO for gate drive power from V_{IN} or $EXTV_{CC}$, RUN and PGOOD pins, a mode selector that allows the converter to run in constant current mode (CCM), pulse-skipping or Burst Mode® operation, and selectable current limit. The DC2221A supports an adjustable output voltage, soft-start and tracking. The wide input voltage range of 16V to 38V is suitable for automotive and distributed DC power systems where low quiescent current is important.

The LTC3807 data sheet gives a complete description of this part, operation and application information. The data sheet must be read in conjunction with this quick start guide for demo circuit 2221A.

The 40V rated MOSFETs, which are used on DC2221A, can be operated at their rated voltage. MOSFETs with higher voltage rating can be used for more safety margin.

The DC2221A supports the LPAK, PowerPAK SO-8 and Power 56 MOSFET packages. The following logic level (SV gate) MOSFETs can be used with DC2221A.

RJK0451DPB	Renesas
BSC093N04LS G	Infineon
Si4124DY	Vishay
FDS8447	Fairchild

For synchronization to an external clock, remove jumper JP2 and apply sync signal on terminal SYNC.

Design files for this circuit board are available at <http://www.linear.com>

PERFORMANCE SUMMARY Specifications are at $T_A = 25^\circ\text{C}$

PARAMETER	CONDITIONS	VALUE	UNITS
Minimum Input Supply Voltage		16	V
Maximum Input Supply Voltage		38	V
Output Voltage Range	$V_{IN} = 16\text{V to }38\text{V}$, $I_{OUT} = 0\text{A to }15\text{A}$	$12 \pm 2\%$	V
Typical Switching Frequency		120	kHz
Typical Output Ripple (V_{OUT} , 12V)	$V_{IN} = 24\text{V}$; $I_{LOAD} = 15\text{A}$	80	mV
Efficiency Typical (V_{OUT} , 12V)	$V_{IN} = 24\text{V}$; $I_{LOAD} = 15\text{A}$	97	%
Supply Quiescent Current	$V_{IN} = 24\text{V}$; $V_{OUT} = 12\text{V}$, $I_O = 0\text{A}$, Burst Mode	110	μA
Supply Shutdown Current	$V_{IN} = 24\text{V}$	38	μA

QUICK START PROCEDURE

Demonstration circuit DC2221A is easy to set up to evaluate the performance of the LTC3807EFE. Refer to Figure 1 for proper measurement equipment setup and follow the procedure below:

NOTE. When measuring the input or output voltage ripple, care must be taken to avoid a long ground lead on the oscilloscope probe. Measure the input or output voltage ripple by touching the probe tip directly across the V_{IN} or V_{OUT} and GND terminals or directly across relevant capacitor. See Figure 2 for proper scope probe technique.

1. Place jumper JP1 in the ON position.

2. With power off, connect the input power supply to V_{IN} and GND.

3. Turn on the power at the input. Check for the proper output voltage:

$$V_{OUT} = 11.9V \text{ to } 12.4V$$

NOTE. If there is no output, temporarily disconnect the load to make sure that the load is not set too high.

4. Once the proper output voltages are established, adjust the load within the operating range and observe the output voltage regulation, ripple voltage, efficiency and other parameters.

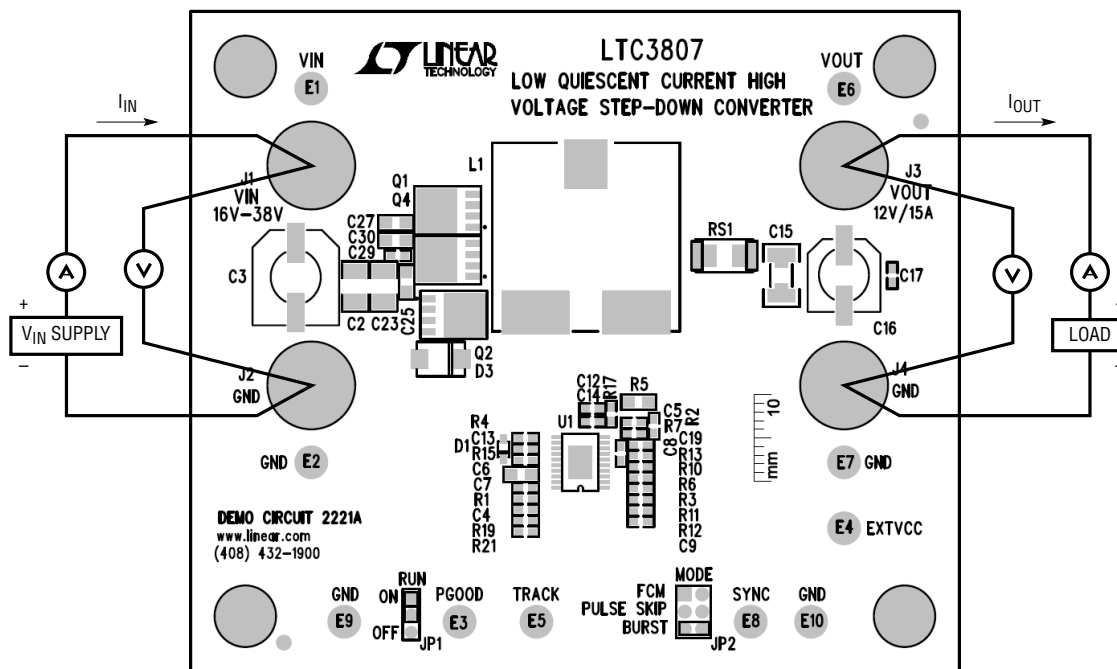

Figure 1. Proper Measurement Equipment Setup

CUSTOMER NOTICE

LINEAR TECHNOLOGY HAS MADE A BEST EFFORT TO DESIGN A BOARD LAYOUT THAT WILL NOT SIGNIFICANTLY AFFECT CIRCUIT OPERATION. HOWEVER, IT REMAINS THE CUSTOMER'S RESPONSIBILITY TO VERIFY PROPER AND RELIABLE OPERATION IN THE ACTUAL APPLICATION. COMPONENT SUBSTITUTION AND PRINTED CIRCUIT BOARD LAYOUT MAY SIGNIFICANTLY AFFECT CIRCUIT TECHNOLOGY APPLICATIONS ENGINEERING FOR ASSISTANCE.

THIS CIRCUIT IS PROPRIETARY TO LINEAR TECHNOLOGY AND SUPPLIED FOR USE WITH LINEAR TECHNOLOGY PARTS.

NOTES:

1. ALL RESISTORS AND CAPACITORS ARE 0603
2. INSTALL SHUNTS AS SHOWN.
3. FOR SYNCHRONIZATION REMOVE JUMPER JP2 'MODE' AND CONNECT SOURCE OF THE SYNC SIGNAL TO TERMINALS 'E8' 'SYNC' AND 'E9' 'GND'.

Information furnished by Linear Technology Corporation is believed to be accurate and reliable. However, no responsibility is assumed for its use. Linear Technology Corporation makes no representation that the interconnection of its circuits as described herein will not infringe on existing patent rights.

DEMO MANUAL DC2221A

DEMONSTRATION BOARD IMPORTANT NOTICE

Linear Technology Corporation (LTC) provides the enclosed product(s) under the following **AS IS** conditions:

This demonstration board (DEMO BOARD) kit being sold or provided by Linear Technology is intended for use for **ENGINEERING DEVELOPMENT OR EVALUATION PURPOSES ONLY** and is not provided by LTC for commercial use. As such, the DEMO BOARD herein may not be complete in terms of required design-, marketing-, and/or manufacturing-related protective considerations, including but not limited to product safety measures typically found in finished commercial goods. As a prototype, this product does not fall within the scope of the European Union directive on electromagnetic compatibility and therefore may or may not meet the technical requirements of the directive, or other regulations.

If this evaluation kit does not meet the specifications recited in the DEMO BOARD manual the kit may be returned within 30 days from the date of delivery for a full refund. **THE FOREGOING WARRANTY IS THE EXCLUSIVE WARRANTY MADE BY THE SELLER TO BUYER AND IS IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED, IMPLIED, OR STATUTORY, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE. EXCEPT TO THE EXTENT OF THIS INDEMNITY, NEITHER PARTY SHALL BE LIABLE TO THE OTHER FOR ANY INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES.**

The user assumes all responsibility and liability for proper and safe handling of the goods. Further, the user releases LTC from all claims arising from the handling or use of the goods. Due to the open construction of the product, it is the user's responsibility to take any and all appropriate precautions with regard to electrostatic discharge. Also be aware that the products herein may not be regulatory compliant or agency certified (FCC, UL, CE, etc.).

No License is granted under any patent right or other intellectual property whatsoever. **LTC assumes no liability for applications assistance, customer product design, software performance, or infringement of patents or any other intellectual property rights of any kind.**

LTC currently services a variety of customers for products around the world, and therefore this transaction **is not exclusive**.

Please read the DEMO BOARD manual prior to handling the product. Persons handling this product must have electronics training and observe good laboratory practice standards. **Common sense is encouraged.**

This notice contains important safety information about temperatures and voltages. For further safety concerns, please contact a LTC application engineer.
