

**LTM4630EY-1**
**Dual 18A or Single 36A  $\mu$ Module  
 Regulator with  $\pm 0.8\%$  DC and  
 $\pm 3\%$  Transient Accuracy**
**DESCRIPTION**

Demonstration circuit 2081A-B features the LTM<sup>®</sup>4630EY-1, the high efficiency, high density, dual 18A, switch mode step-down  $\mu$ Module<sup>®</sup> regulator with  $\pm 0.8\%$  total DC output accuracy. The input voltage is from 4.5V to 15V. The output voltage is programmable from 0.6V to 1.8V. DC2081A-B is configured as dual-phase, single-output, which can deliver up to 36A maximum. With the help of external compensation,  $\pm 3\%$  transient accuracy can be achieved with 25% load step. The board designs with minimum components to demonstrate this high efficiency, high density  $\mu$ Module. As explained in the data sheet, output current de-rating is

necessary for certain  $V_{IN}$ ,  $V_{OUT}$ , and thermal conditions. These features and the availability of the LTM4630EY-1 in a compact 16mm  $\times$  16mm  $\times$  5.01mm BGA package make it ideal for use in many high-density point-of-load applications. The LTM4630-1 data sheet must be read in conjunction with this demo manual for working on or modifying the demo circuit DC2081A-B.

**Design files for this circuit board are available at <http://www.linear.com/demo/DC2081A-B>**

LT, LT, LTC, LTM, Linear Technology, the Linear logo and  $\mu$ Module are registered trademarks of Linear Technology Corporation. All other trademarks are the property of their respective owners.

**PERFORMANCE SUMMARY** Specifications are at  $T_A = 25^\circ\text{C}$ 

PARAMETER	CONDITIONS	VALUE
Input Voltage Range		4.5V ~ 15V
Output Voltage $V_{OUT}$	$V_{IN} = 4.5 \sim 15\text{V}$ , $I_{OUT} = 0 \sim 36\text{A}$ (for LTM4630-1A)	$1.0\text{V} \pm 0.8\%$ (0.992V ~ 1.008V)
Maximum Continuous Output Current	De-rating is Necessary for Certain $V_{IN}$ , $V_{OUT}$ and Thermal Conditions, See Data Sheet for Detail	36A
Default Operating Frequency		400kHz
Efficiency	$V_{IN} = 5\text{V}$ , $V_{OUT} = 1.0\text{V}$ , $I_{OUT} = 36\text{A}$ , $f_{SW} = 400\text{kHz}$	85.7%, See Figure 2
Load Transient	$V_{IN} = 12\text{V}$ , $V_{OUT} = 1.0\text{V}$ , $I_{STEP} = 0 \sim 9\text{A}$	$< 56.3\text{mV}_{P-P}$ , See Figure 3

## DC2081A-B BOARD PHOTO

## QUICK START PROCEDURE

Demonstration circuit DC2081A-B is easy to set up to evaluate the performance of the LTM4630-1. Please refer to Figure 1 for proper measurement setup and follow the procedure below:

1. With power off, connect the input power supply, load and meters as shown in Figure 1. Preset the load to 0A and  $V_{IN}$  supply to 12V.
2. Turn on the power supply at the input. The output voltage should be  $1.0V \pm 0.8\%$  ( $0.992V \sim 1.008V$ ).
3. Once the proper output voltage is established, adjust the load within the operating range and observe the output voltage regulation, output voltage ripple, efficiency and other parameters. Output ripple can be measured at J6 with BNC cables.
4. (Optional) For optional load transient test, apply an adjustable pulse signal between "IOSTEP CLK" and "GND" test point. Pulse amplitude ( $3V \sim 3.5V$ ) sets the load step current amplitude. The output transient current can be monitored at the BNC connector J5 ( $15mV/A$ ). The pulse signal should have very small duty cycle ( $< 10\%$ ) to limit the thermal stress on the transient load circuit.

## DEMONSTRATION BOARD IMPORTANT NOTICE

Linear Technology Corporation (LTC) provides the enclosed product(s) under the following **AS IS** conditions:

This demonstration board (DEMO BOARD) kit being sold or provided by Linear Technology is intended for use for **ENGINEERING DEVELOPMENT OR EVALUATION PURPOSES ONLY** and is not provided by LTC for commercial use. As such, the DEMO BOARD herein may not be complete in terms of required design-, marketing-, and/or manufacturing-related protective considerations, including but not limited to product safety measures typically found in finished commercial goods. As a prototype, this product does not fall within the scope of the European Union directive on electromagnetic compatibility and therefore may or may not meet the technical requirements of the directive, or other regulations.

If this evaluation kit does not meet the specifications recited in the DEMO BOARD manual the kit may be returned within 30 days from the date of delivery for a full refund. **THE FOREGOING WARRANTY IS THE EXCLUSIVE WARRANTY MADE BY THE SELLER TO BUYER AND IS IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED, IMPLIED, OR STATUTORY, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE. EXCEPT TO THE EXTENT OF THIS INDEMNITY, NEITHER PARTY SHALL BE LIABLE TO THE OTHER FOR ANY INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES.**

The user assumes all responsibility and liability for proper and safe handling of the goods. Further, the user releases LTC from all claims arising from the handling or use of the goods. Due to the open construction of the product, it is the user's responsibility to take any and all appropriate precautions with regard to electrostatic discharge. Also be aware that the products herein may not be regulatory compliant or agency certified (FCC, UL, CE, etc.).

No License is granted under any patent right or other intellectual property whatsoever. **LTC assumes no liability for applications assistance, customer product design, software performance, or infringement of patents or any other intellectual property rights of any kind.**

LTC currently services a variety of customers for products around the world, and therefore this transaction **is not exclusive**.

**Please read the DEMO BOARD manual prior to handling the product.** Persons handling this product must have electronics training and observe good laboratory practice standards. **Common sense is encouraged.**

This notice contains important safety information about temperatures and voltages. For further safety concerns, please contact a LTC application engineer.
